

Your Gift Saves More Lives and Heals More Hearts

"Innovation has enabled us to replace many open chest, open heart surgeries with interventional techniques. It requires an investment in the right team, the right technology, the right environment, but we believe the next quantum leap forward in cardiovascular care could originate right here at HonorHealth."

– DAVID G. RIZIK, MD, MSCAI

*FACC Chief, Complex
Interventional Cardiology
HonorHealth Cardiovascular
Center of Excellence*

Because of you and your generous support of HonorHealth's Cardiovascular Center of Excellence, we are changing and saving lives.

Your investment is creating a renowned center of excellence, including expertise, infrastructure, technology and services.

It's these gifts that make an immediate impact and help create one of the leading destinations for comprehensive heart care in the country.

And for that, we thank you!

One Act, Exponential Impact!

Every patient and family's experience with HonorHealth is enhanced because of philanthropy.

Your donation to HonorHealth's Cardiovascular Center of Excellence provides a wide array of benefits and resources to patients, as well as medical and clinical staff across our hospital system.

Over the past year, we have used funds provided by you, our gracious donors, for a number of programs, capital equipment acquisitions and clinical education to support our care for patients in our community, including:

- **Opening two new, state-of-the-art procedural rooms at Shea Medical Center**, to provide hundreds of complex procedures and care to electrophysiology, cardiology, vascular and cardiothoracic patients.

- **Acquiring 135 new EKG carts** to replace the entire fleet across all HonorHealth hospitals. These carts service more than 100,000 patients each year. We were also able to shift displaced devices from the hospital to our outpatient clinics, where they provide service to tens of thousands of patients per year.

Your Philanthropy Makes a Difference When and Where It's Needed Most

- **Replacing our entire cardiac echo cart fleet** (40 devices) across the hospital division, which provide cardiac echo studies to more than 25,000 patients annually.

- **Replacing cardiac stress systems** across the hospitals, which provide diagnostic studies to 5,000 patients per year.

- **Through capital relief initiatives, we acquired numerous supporting technologies through the span of care from acute to ambulatory.** These include procedural coronary artery diagnostic devices and outpatient cardiac rehab patient monitoring systems.

- **Acquiring a radiation safety device** to reduce the amount of radiation to a procedural cardiologist and supporting clinical staff to practically zero exposure. We are working with the State of Arizona to demonstrate the effectiveness of this device, to be able to implement it at various locations in our facilities.

- **Sending nurses, sonographers and technologist** to a variety of clinical educational opportunities locally and nationally.

- And because of your support of our continuing education, our **clinical staff are able to advance their formal education and obtain baccalaureate through doctoral degrees** in their areas of expertise.
